Natalia Garrido Agudo
Full Stack Developer

[Personal Web Page](#)
n.garridoagudo@gmail.com   663828466
Collado Villalba, Madrid.

PROFILE

- Full stack developer, React, JavaScript, CSS, HTML, PWA, .Net Framework v4.5 - v4.8, Net Core, C#, MVC, Razor, SQL

- Good level of English both spoken and written

- People skills, experience in public work.

- Good skills and knowledge in creative and artistic work; photography, design, drawing, plastic arts, dance ...

EDUCATION

2021	**React .JS** through internal training on Ultima Software **and Udemy courses.**
2017-2018	**.Net, C# training with tutor** ([Sergio Tamarit Lázaro](#))
2017	**Design and layout of web pages.** HTML5, CSS and JQuery. Spanish Association of Computer Programmers (AEPI) (120 hours)
2017	**Design of web pages.** Escuela Superior de Formación (ESF Group) (50 hours)
2013 - 2014	**Free-time instructor course.** Theoretical part at Escuela Rastros (Title issued by CAM) 150 hours. Practices carried out at the Cañada Real Iberian fauna reception and reception center. Open Nature Camp 2014 with children from 6 to 12 years old. (120 hours)
2006 – 2012	**Degree in Environmental Sciences** URJC, Móstoles (Madrid). Erasmus Scolarship. "Uniwersytet Wroclawski" Wroclaw (Polonia) (2010)

➢ **Ultima Software (September 2018 - April 2021)**

In my beginnings as a programmer in this company I focused on objectives and tasks such as:

- Development, maintenance and support of Web applications through ASP.Net MVC, creating Razor views, new entities in the own ORM, and designing new methods.
- Creation of a user interface such as BackOffice for the client.
- Performing stored procedures in SQL
- Management of bugs, change request and support ticket directly with the client.

At this stage I used tools / technologies such as: ASP.Net MVC, Javascript, JQuery, Json, KnockOut, SQL Management Studio, REST API Services, Postman, Bootstrap3, TFS

Subsequently, due to a powerful growth, the company had to face some changes at a structural, functional and task management level that made us to adopt some changes to the development team in addition to continuing with everything we had already been doing:

- Regarding technological restructuring: an update of the user interface and the creation of new services were carried out.
  - o Initially I was in the back team developing new functionalities such as rest services, analyzing customer requirements and agreeing on time with the new front team which was the most efficient way to deal with each one of them, later I fully took on the role of link between the front and back taking care of debugging possible incidents that may have and supporting them by developing new functionalities.
  - o Development of complete functionalities, from the design of databases, entities and their configuration in the ORM, creation of user interface and internal procedures.

Tools used here: ASP.Net MVC, Own ORM, Javascript, SQL Management Studio, REST API Services, Postman, React Js, Bootstrap3,

- Regarding the workflow restructuring, these are some changes that I faced:
  - o Switching from TFS to Azure Devops using GIT as a code repository.
  - o Adaptation to new tools and a new philosophy of continuous deliveries and code control; pull requests, code reviews, automated deployments (CI / CD)

Tools used here: Azure Devops, GIT, .Net, Postman, Visual Studio 2017/2019, Scrum methodology.

➢ **Freelance projects (2018 - 2020) /** WordPress Freelance

- Creation of web pages for freelance clients.
  - o WordPress design according to customer specifications.
    - ▪ With plugins such as Elementor, Envato Themes and tools such as Photoshop, Illustrator.
